

# IMFデータの使い方

## 目次

- IMFデータを検索・取得する際に起点となる“IMF Data”ウェブサイトの紹介
- “IMF Data”ウェブサイトから以下の主要データベースへのアクセス方法と、各データベースの使用例を紹介 [… P. 02](#)
  - 1) IMF Data Mapper [… P. 05](#)
  - 2) IMF Data Portal [… P. 11](#)
  - 3) WEOデータベース [… P. 15](#)
- WEOLレポートに掲載された図表データの取得方法 [… P. 22](#)
- IMF Portwatchの紹介 [… P. 27](#)

# IMF Data(1) アクセス方法

- “IMF Data” ウェブサイトはIMFデータを検索・取得する際のゲートウェイ
- IMFホームページ (<https://www.imf.org/en/Home>) から“Data”をクリックし、IMF Data (<https://www.imf.org/en/Data>) にアクセス、またはサーチエンジンで“IMF data”等で検索してアクセス

## IMFホームページ

The screenshot shows the IMF Home page. The navigation menu at the top includes 'ABOUT', 'RESEARCH', 'COUNTRIES', 'CAPACITY DEVELOPMENT', 'NEWS', 'VIDEOS', 'DATA', and 'PUBLICATIONS'. A red box highlights the 'DATA' link, with a red arrow pointing to it from the word 'DATA' written in a red box. Below the navigation menu, there are several featured articles and sections, including 'Economics Authors Confront Toughest Questions on Data, History, and Theory', 'Inflation and Monetary Policy', 'Finance & Development', and 'Ask an Economist'. At the bottom, there is a section for 'Special Drawing Rights (SDR)' and 'IMF DataMapper'.

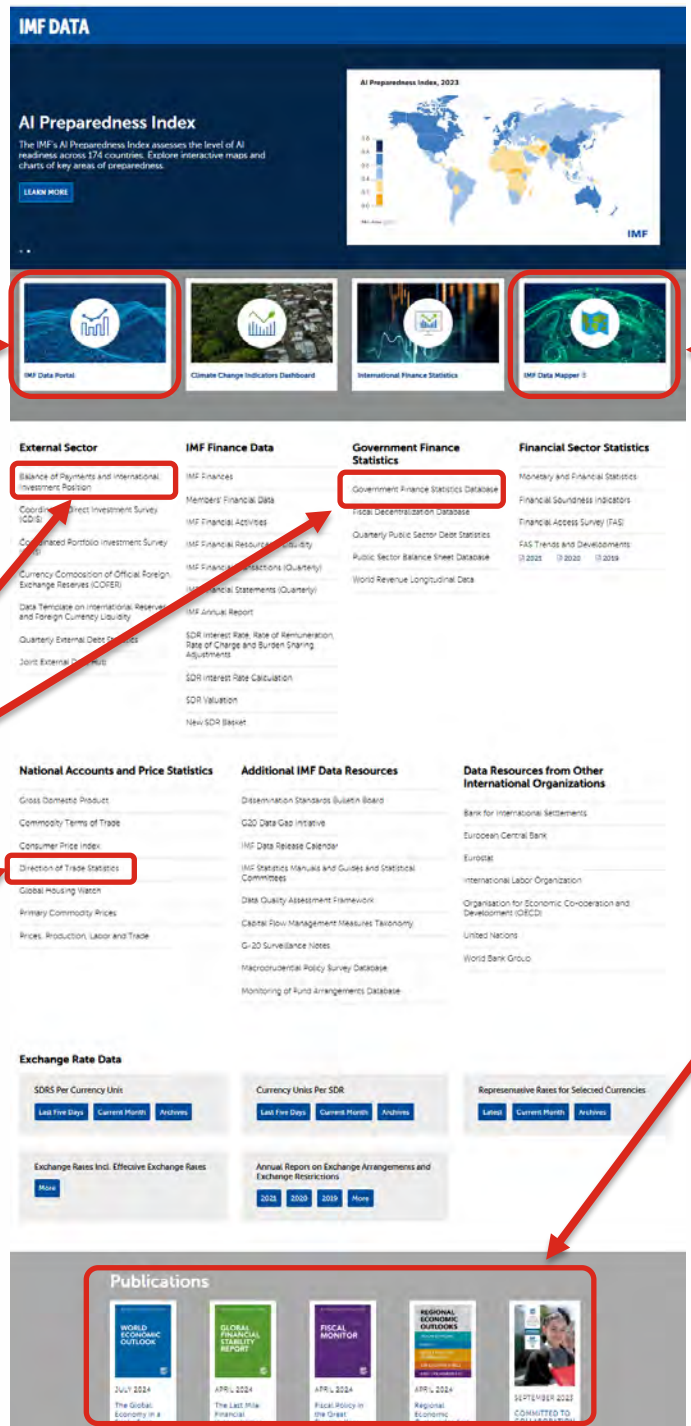

## IMF Data

The screenshot shows the IMF Data website. The header includes the IMF logo and navigation links: 'ABOUT', 'RESEARCH', 'COUNTRIES', 'CAPACITY DEVELOPMENT', 'NEWS', 'VIDEOS', 'DATA', and 'PUBLICATIONS'. The main content area features a 'Chart of the Week: Integrating Economic and Climate Data Will Strengthen Climate Policy' with a 'LEARN MORE' button. Below this, there are four data portals: 'IMF Data Portal', 'Climate Change Indicators Dashboard', 'International Finance Statistics', and 'IMF Data Mapper 2'. At the bottom, there are four columns of data categories: 'External Sector', 'IMF Finance Data', 'Government Finance Statistics', and 'Financial Sector Statistics'.

IMF DATAMAPPER DATASETS WORLD ECONOMIC OUTLOOK (APRIL 2024)

### World Economic Outlook (April 2024)

This version of the IMF Data Mapper contains only selected key indicators from the World Economic Outlook (WEO). The WEO publication is available in full on the IMF's website, [www.imf.org](http://www.imf.org). Accompanying it on the website is a larger compilation of data from the WEO database than is included in the IMF Data Mapper.

The data appearing in the World Economic Outlook (WEO) are compiled by the IMF staff at the time of the WEO exercises. The historical data and projections are based on the information gathered by the IMF country desk officers in the context of their missions to IMF member countries and through their ongoing analysis of the evolving situation in each country. Historical data are updated on a continual basis, as more information becomes available, and structural breaks in data are often adjusted to produce smooth series with the use of splicing and other techniques. IMF staff estimates continue to serve as proxies for historical series when complete information is unavailable. As a result, WEO data can differ from other sources with official data, including the IMF's International Financial Statistics.

The WEO data and metadata provided are "as is" and "as available," and every effort is made to ensure, but not guarantee, their timeliness, accuracy, and completeness. When errors are discovered, there is a concerted effort to correct them as appropriate and feasible. For details on the terms and conditions for usage of the WEO database, please refer to the IMF Copyright and Usage website.

#### Real GDP Growth

GROSS DOMESTIC PRODUCT (GDP) 7 INDICATORS, 1980 - 2029

Indicator	Unit
Real GDP growth	Annual percent change
GDP, current prices	Billions of U.S. dollars
GDP per capita, current prices	U.S. dollars per capita
GDP, current prices	Purchasing power parity; billions of international dollars
GDP per capita, current prices	Purchasing power parity; international dollars per capita

INFLATION 2 INDICATORS, 1980 - 2029

Indicator	Unit
Inflation rate, average consumer prices	Annual percent change
Inflation rate, end of period consumer prices	Annual percent change

The World Economic Outlook (WEO) database contains selected macroeconomic data series from the statistical appendix of the *World Economic Outlook* report, which presents the IMF staff's analysis and projections of economic developments at the global level, in major country groups and in many individual countries. The WEO is released in April and September/October each year.

Use this database to find data on national accounts, inflation, unemployment rates, balance of payments, fiscal indicators, trade for countries and country groups (aggregates), and commodity prices whose data are reported by the IMF.

Data are available from 1980 to the present, and projections are given for the next two years. Additionally, medium-term projections are available for selected indicators. For some countries, data are incomplete or unavailable for certain years.

The World Economic Outlook (WEO) database is now available in SDMX format from our Entire Dataset page. For more information about SDMX, please visit [SDMX.org](https://www.sdmx.org)

World Economic Outlook

A Survey by the IMF staff usually published twice a year. It presents IMF staff economists' analyses of global economic developments during the near and medium term. Chapters give an overview as well as more detailed analysis of the world economy, consider issues affecting industrial countries, developing countries, and economies in transition to market, and address topics of pressing current interest. Annexes, boxes, charts, and an extensive statistical appendix augment the text.

See also, the World Economic Databases.

World Economic Outlook Update, July 2024: The Global Economy in a Sticky Spot  
July 16, 2024

Description:

**The Global Economy in a Sticky Spot**  
Global growth is projected to be in line with the April 2024 World Economic Outlook (WEO) forecast, at 3.2 percent in

World Economic Outlook, April 2024: Steady but Slow: Resilience amid Divergence  
April 16, 2024

Description:

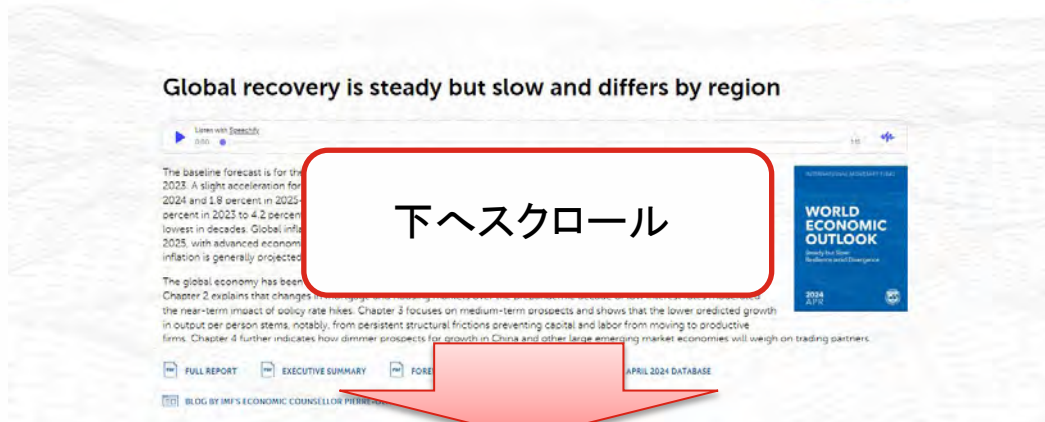

**Steady but Slow: Resilience amid Divergence**  
The baseline forecast is for the world economy to continue growing at 3.2 percent during 2024 and 2025, at the same pace as in 2023. A slight acceleration for advanced economies—where growth is expected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025—will be offset by a modest slowdown in emerging market and developing economies from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now—at 3.1 percent—is at its lowest in decades. Global inflation is forecast to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to decline more gradually. The global economy has been surprisingly resilient, despite significant central bank interest rate hikes to

WEO April 2024

WEO April 2024 Chapter 1

## Chapters in the Report

### Chapter 1: Global Prospects and Policies

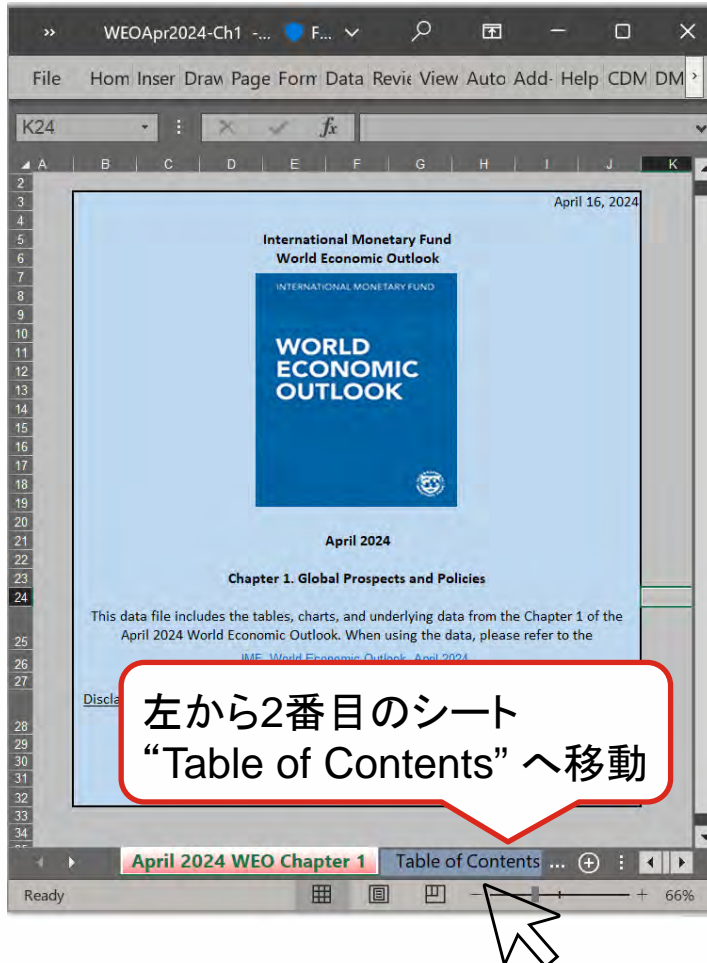

Economic activity was surprisingly resilient through the global disinflation of 2022–23. As global inflation descended from its mid-2022 peak, economic activity grew steadily, defying warnings of stagflation and global recession. However, the pace of expansion is expected to be low by historical standards and the speed of convergence toward higher living-standards for middle- and lower-income countries has slowed, implying persistent global disparities. With inflationary pressures abating more swiftly than expected in many countries, risks to the global outlook are now broadly balanced compared with last year. Monetary policy should ensure that inflation touches down smoothly. A renewed focus on fiscal consolidation is needed to rebuild room for budgetary maneuver and priority
