1/ Uses the authorities' revenue classification.

2/ Uses preliminary fiscal data available as of February 2003. Recent information indicates that the 2002 revenue outturn was higher than shown in this table.

3/ Interest payments are lower than in the Staff Report fiscal table, due to reclassification of various bank fees. In 2000, the restructuring of NBU loans has been accounted for as additional interest payment and domestic financing (Hrv 724 million).

4/ Financing data is derived from the monetary survey, resulting in a statistical discrepancy between the deficit and financing.

2/ Interest payments are lower than in the Staff Report fiscal table, due to reclassification of various bank fees. In 2000, the restructuring of NBU loans has been accounted for as additional interest payment and domestic financing (Hrv 724 million).
