

REFORMING THE INTERNATIONAL TAXATION SYSTEM

Susana Ruiz

14th April 2014

OXFAM

The new tax paradigm: Corporates paying less, burden shifting to families

Figure 2: Tax revenue change 2007–2015 (%GDP)

Oxfam calculations based on OECD data available for 35 OECD and 43 non-OECD countries (unweighted averages).¹¹³ Axis figures represent pp – percentage points of GDP.

A phantom economy?

Global FDI to offshore centers - 2000 to 2015

Source: IMF

- 8 major pass-through economies: (the Netherlands, Hong Kong, BVI, Bermuda, Cayman Islands, Ireland and Singapore) **host MORE THAN 85% of global investment** in special purpose entities, often set only for tax reasons

OXFAM

New business model, old problems

Time for real solutions

Data is the new oil

- Tax challenges of digitalization not limited to specific business sectors
- **But** existing problems are exacerbated by digitalization
- Implementation of BEPS has left room for profit shifting and increased tax competition for real investment

OXFAM

Time for a historic reform
One without the other will not make it
