Determinants of Growth in Low-Income Asia

by Ari Aisen

International Monetary Fund

Questions

- What are the determinants of growth in low-income Asia?
- What can be learned from the growth experience of emerging-Asia?
- What are the policy implications of the analysis?

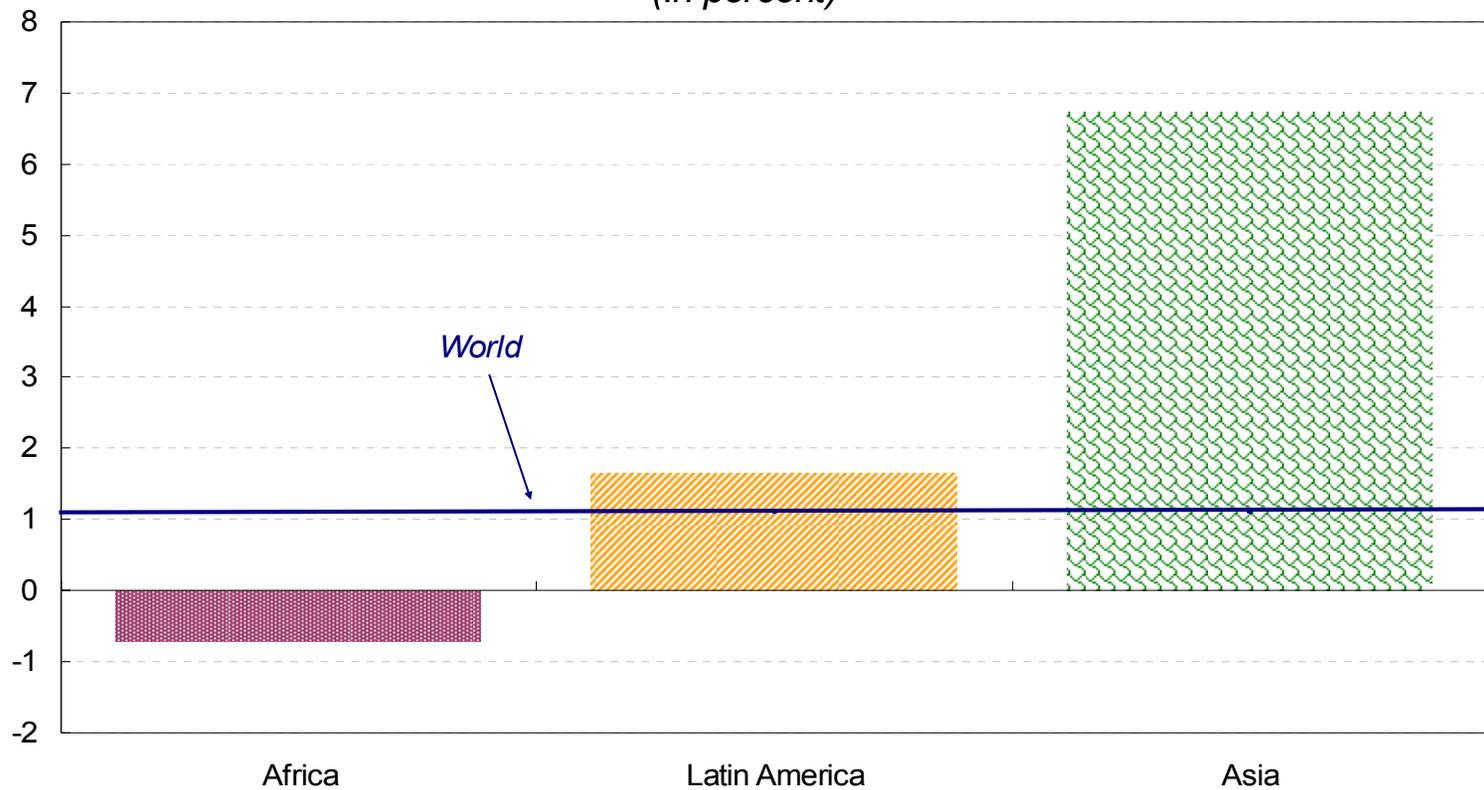

Outline

- I. Stylized facts of GDP growth
- II. Econometric model
- III. Comparative exercise low-income and emerging Asia
- IV. Policy recommendations

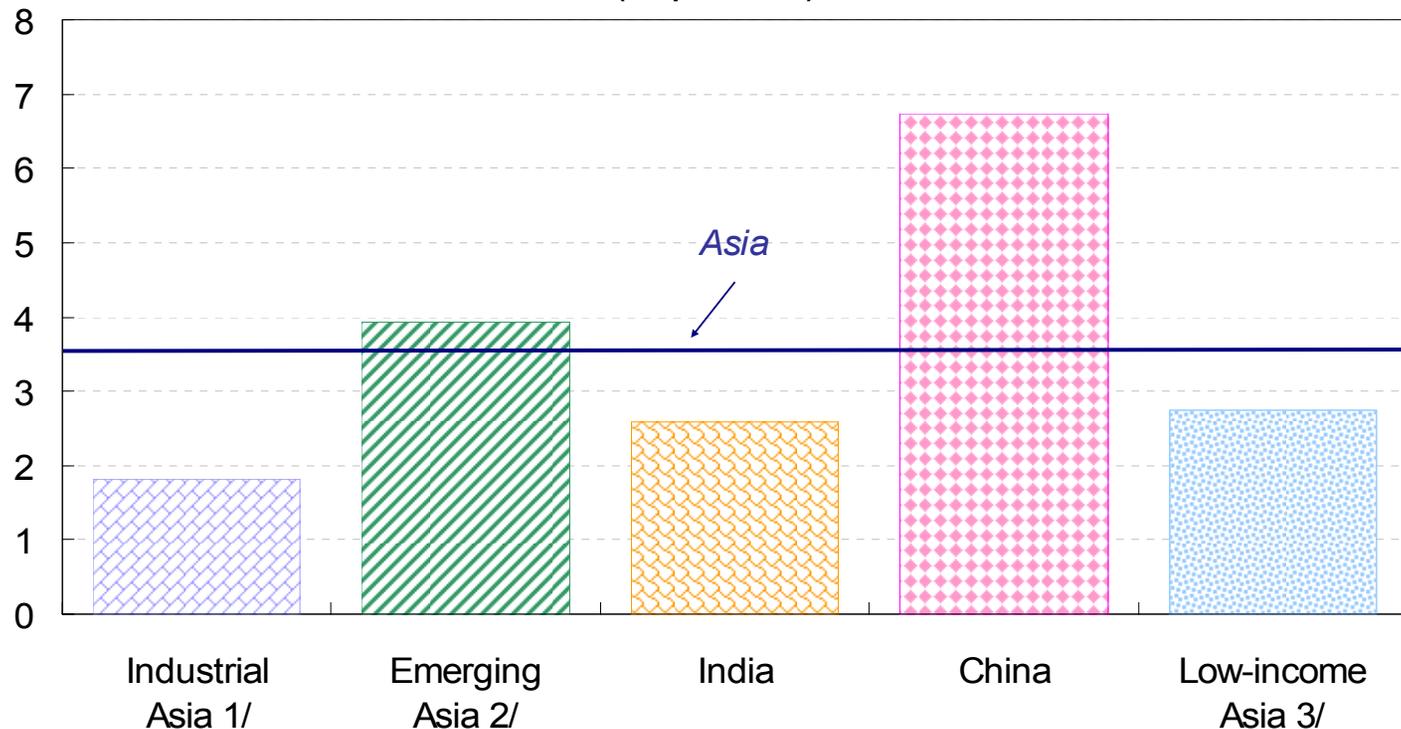

Growth in Asia has been higher than the world average...

Average of Real Growth in 1970 to 2000
(In percent)

...but differences in performance have been significant within Asia.

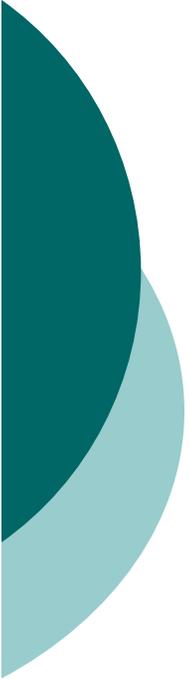

Average of Real Growth in 1970–2000
(In percent)

1/ Industrial Asia consists of Australia, Japan, and New Zealand.

2/ Emerging Asia consists of Indonesia, Korea, Malaysia, Philippines, Singapore, and Thailand.

3/ Low-income Asia consists of Bangladesh, Bhutan, Cambodia, Lao P.D.R., Mongolia, Myanmar, Nepal, Sri Lanka, and Vietnam.

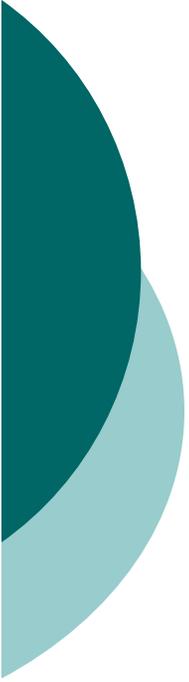

II. Econometric Model

- Dataset covers 146 developing countries in the period 1970-2000.
- Standard growth model (Barro and Sala-i-Martin, 2004)

$$GDPgrowth_{it} = \alpha \log(GDP_{i,t-1}) + \mathbf{X}'_{i,t} \boldsymbol{\beta}_1 + v_i + \varepsilon_{it}$$

$$i = 1, \dots, N \quad t = 1, \dots, T_i$$

Explanatory Variables

- **Investment/GDP**
- **Government consumption/GDP**
- **Openness**
- **Enrolment in primary school**
- **Rule of law**
- Inflation
- Growth of terms of trade
- Political instability (cabinet changes)
- Democracy
- Fertility
- Decade dummies
- Country dummies

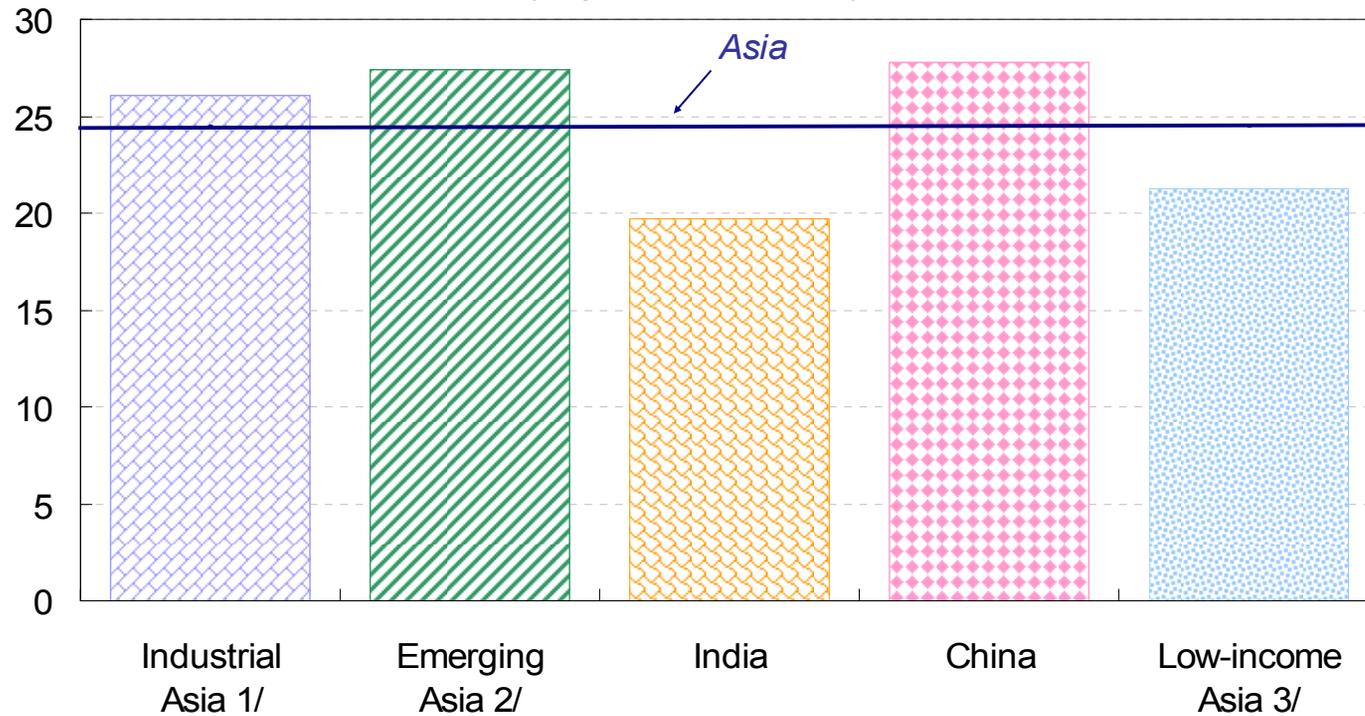

Cross-Country Growth Regressions

1/ Regressions include a constant and dummies for decades. Estimates are obtained from a panel dataset of 84 developing countries in the period 1970–2000 with fixed effects with exception of regressions in columns (1), (11) and (12) estimated using random effects; robust standard errors in parentheses; and * significant at 10 percent; ** significant at 5 percent; *** significant at 1 percent.

Investment

Average of Investment Ratio in 1970–2000
(In percent of GDP)

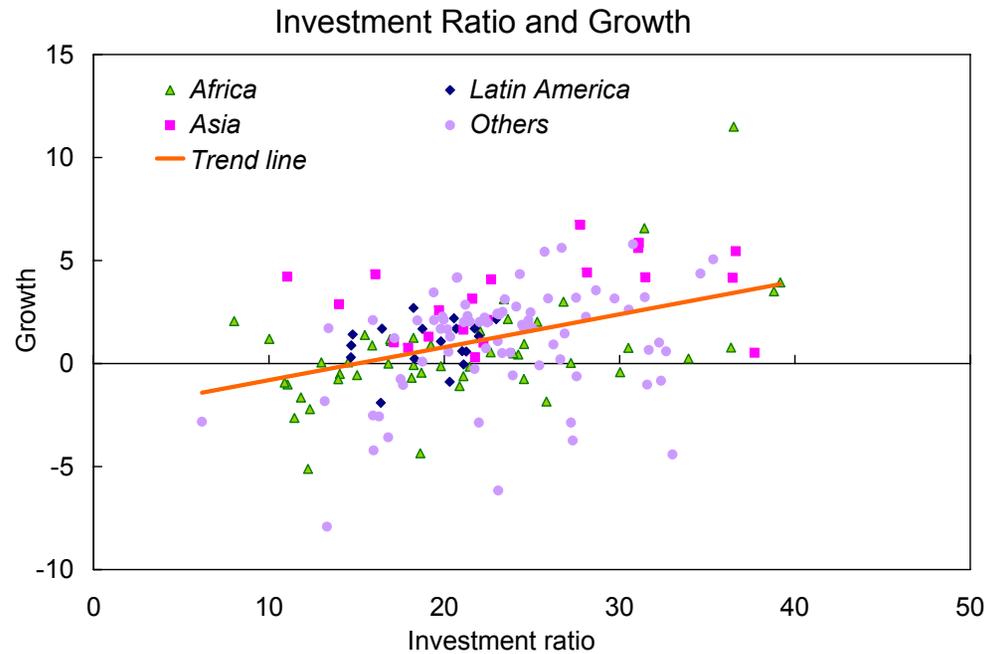

1/ Industrial Asia consists of Australia, Japan, and New Zealand.

2/ Emerging Asia consists of Indonesia, Korea, Malaysia, Philippines, Singapore, and Thailand.

3/ Low Income Asia consists of Bangladesh, Bhutan, Cambodia, Lao PDR, Mongolia, Myanmar, Nepal, Sri Lanka, and Vietnam.

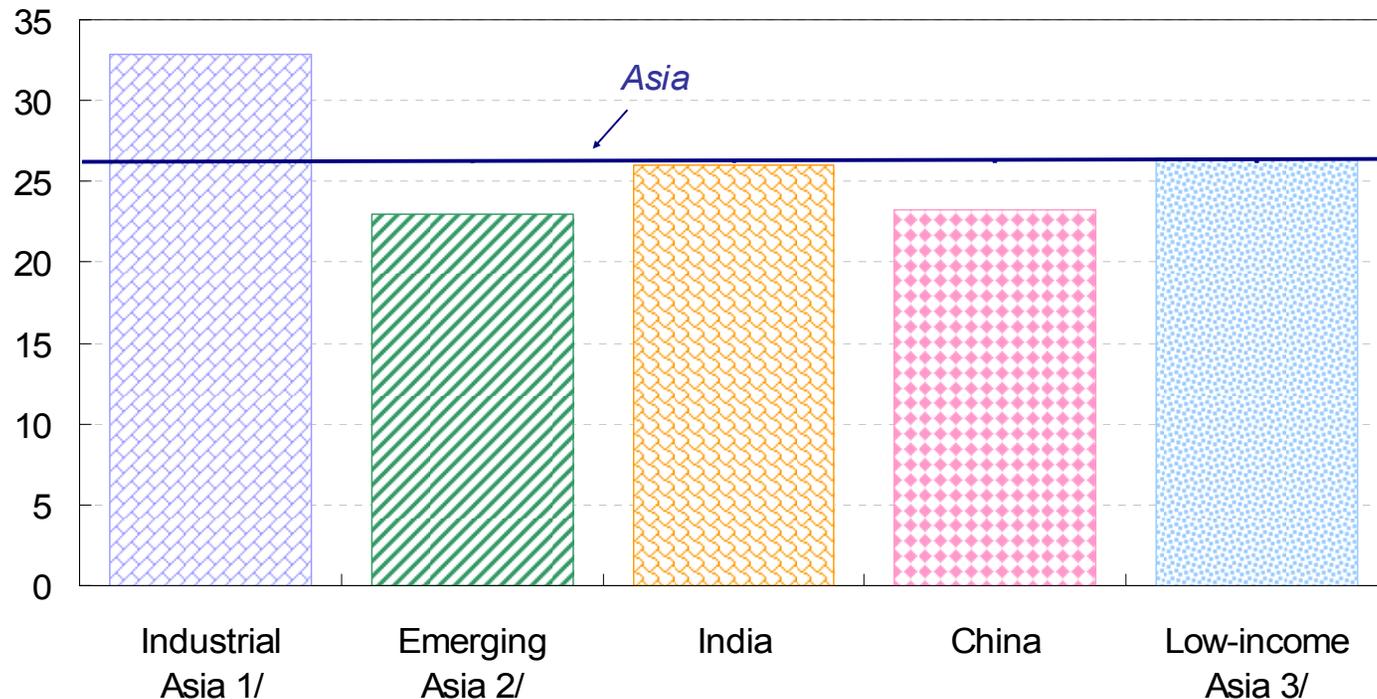

Marginal Effects on Growth

Low-income Asia	0.19
Emerging Asia	0.51
Emerging Asia, excluding India and China	0.43
Rest of developing countries	0.19

Government Consumption

Average Government Consumption in 1970–2000
(In percent of GDP)

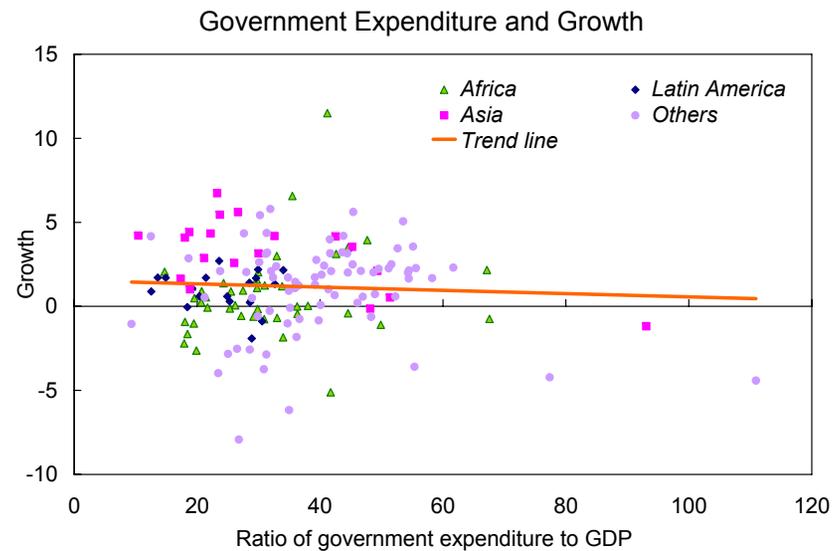

1/ Industrial Asia consists of Australia, Japan, and New Zealand.

2/ Emerging Asia consists of Indonesia, Korea, Malaysia, Philippines, Singapore, and Thailand.

3/ Low Income Asia consists of Bangladesh, Bhutan, Cambodia, Lao PDR, Mongolia, Myanmar, Nepal, Sri Lanka, and Vietnam.

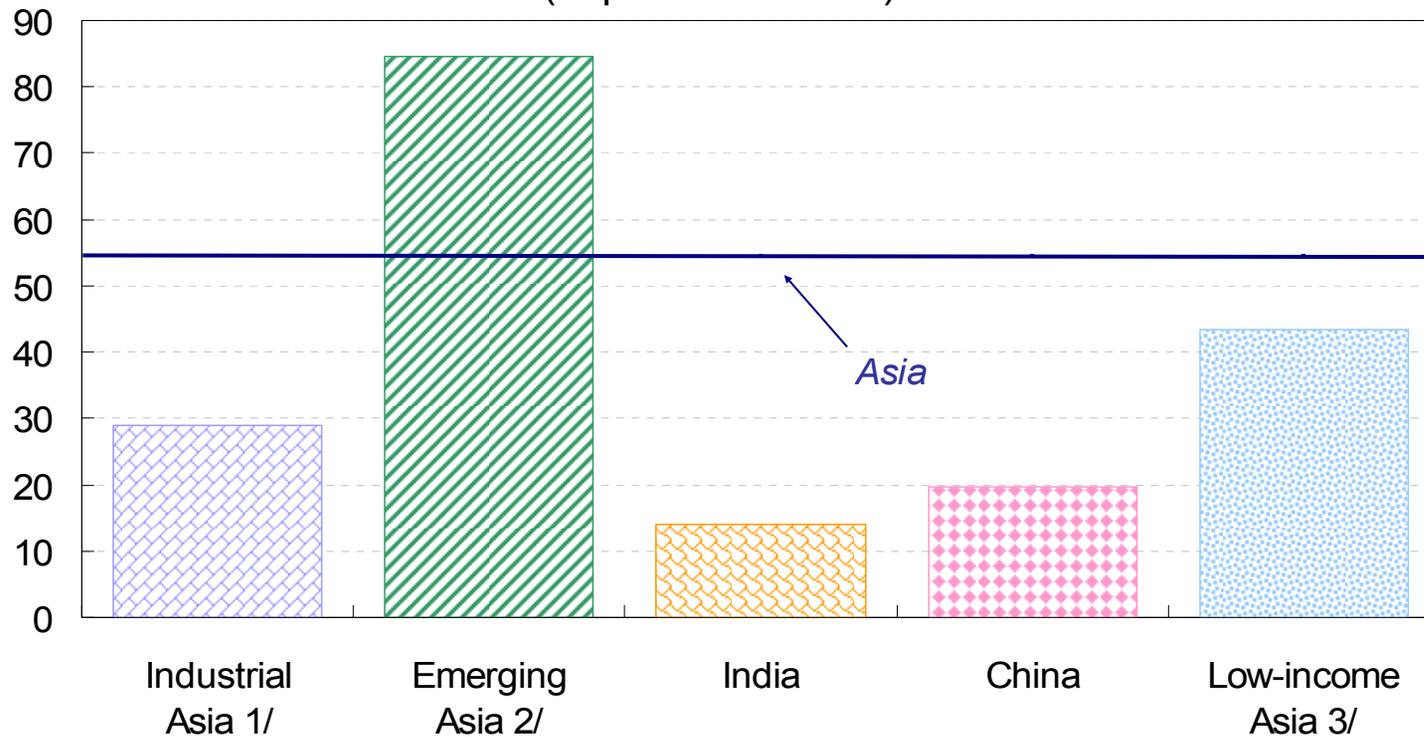

Marginal Effects on Growth

Low-income Asia	-0.18
Emerging Asia	-0.51
Emerging Asia, excluding India and China	-0.18
Rest of developing countries	-0.17

Openness

Average of Openness in 1970–2000
(In percent of GDP)

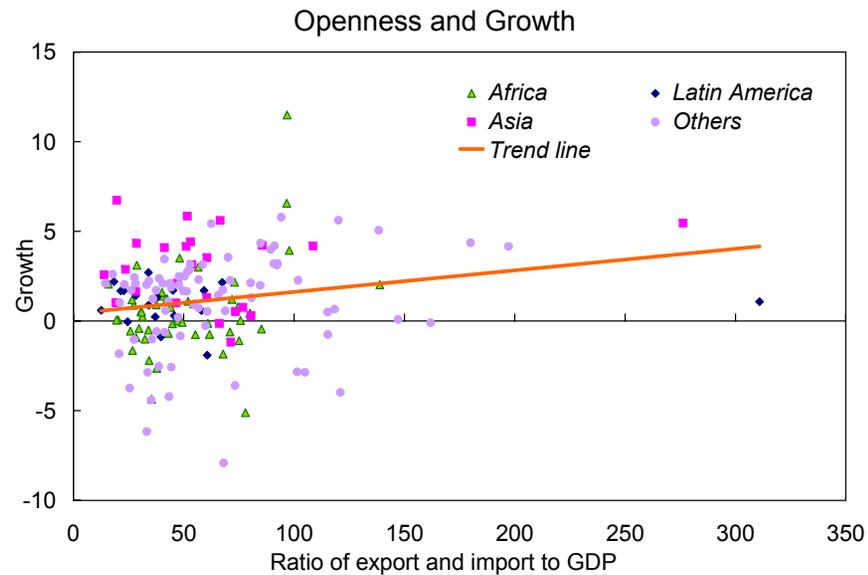

1/ Industrial Asia consists of Australia, Japan, and New Zealand.

2/ Emerging Asia consists of Indonesia, Korea, Malaysia, Philippines, Singapore, and Thailand.

3/ Low Income Asia consists of Bangladesh, Bhutan, Cambodia, Lao PDR, Mongolia, Myanmar, Nepal, Sri Lanka, and Vietnam.

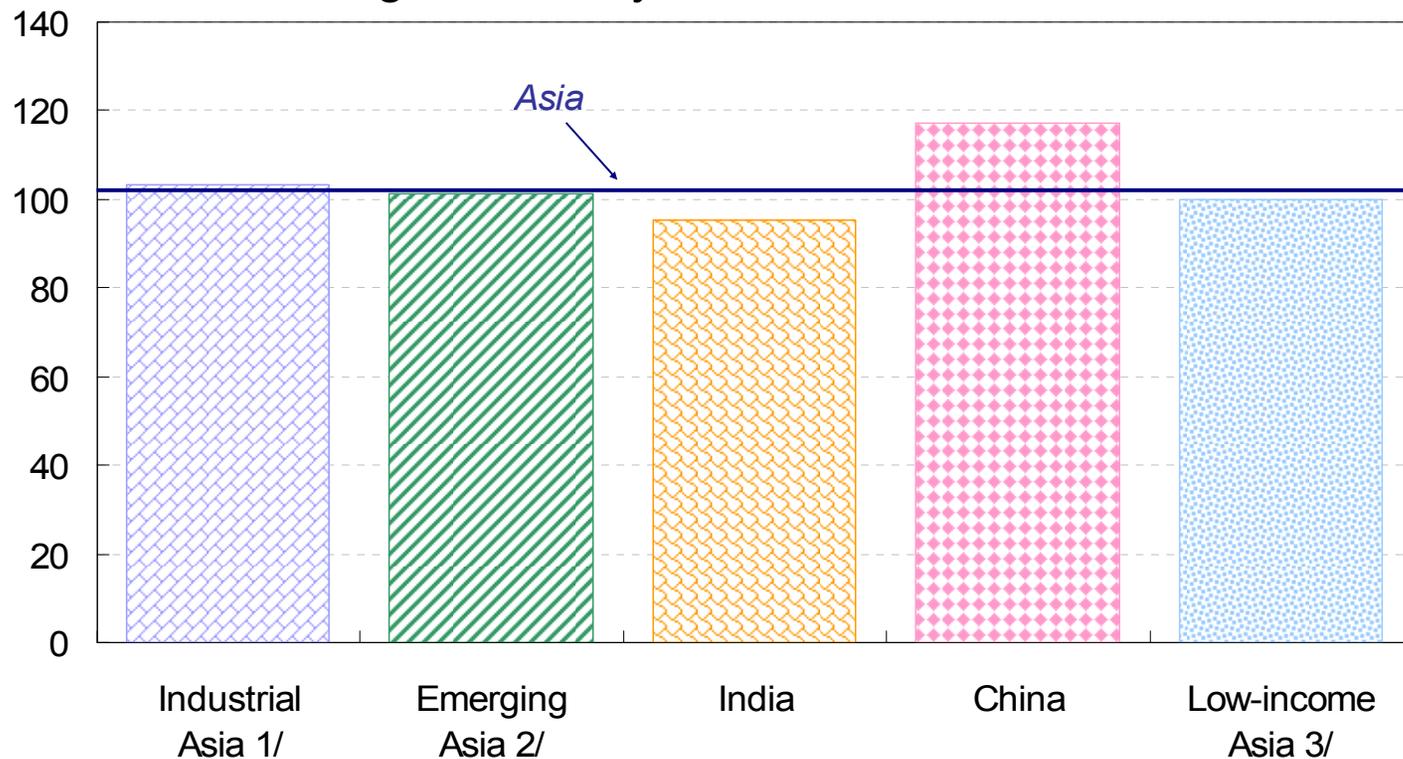

Marginal Effects on Growth

Low-income Asia	0.04
Emerging Asia	0.04
Emerging Asia, excluding India and China	0.04
Rest of developing countries	0.04

Primary Scholl Enrolment

Average of Primary Enrollment in 1970–2000

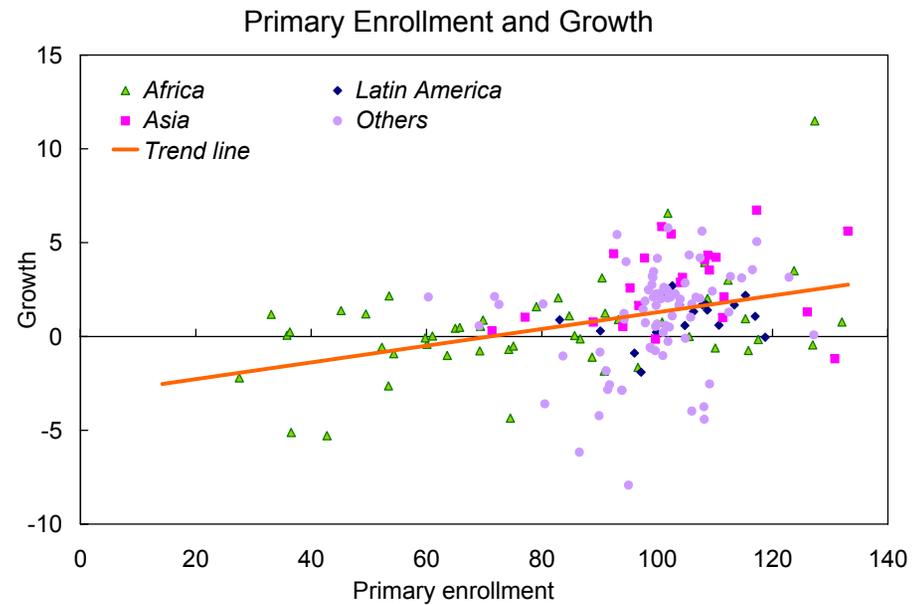

1/ Industrial Asia consists of Australia, Japan, and New Zealand.

2/ Emerging Asia consists of Indonesia, Korea, Malaysia, Philippines, Singapore, and Thailand.

3/ Low Income Asia consists of Bangladesh, Bhutan, Cambodia, Lao PDR, Mongolia, Myanmar, Nepal, Sri Lanka, and Vietnam.

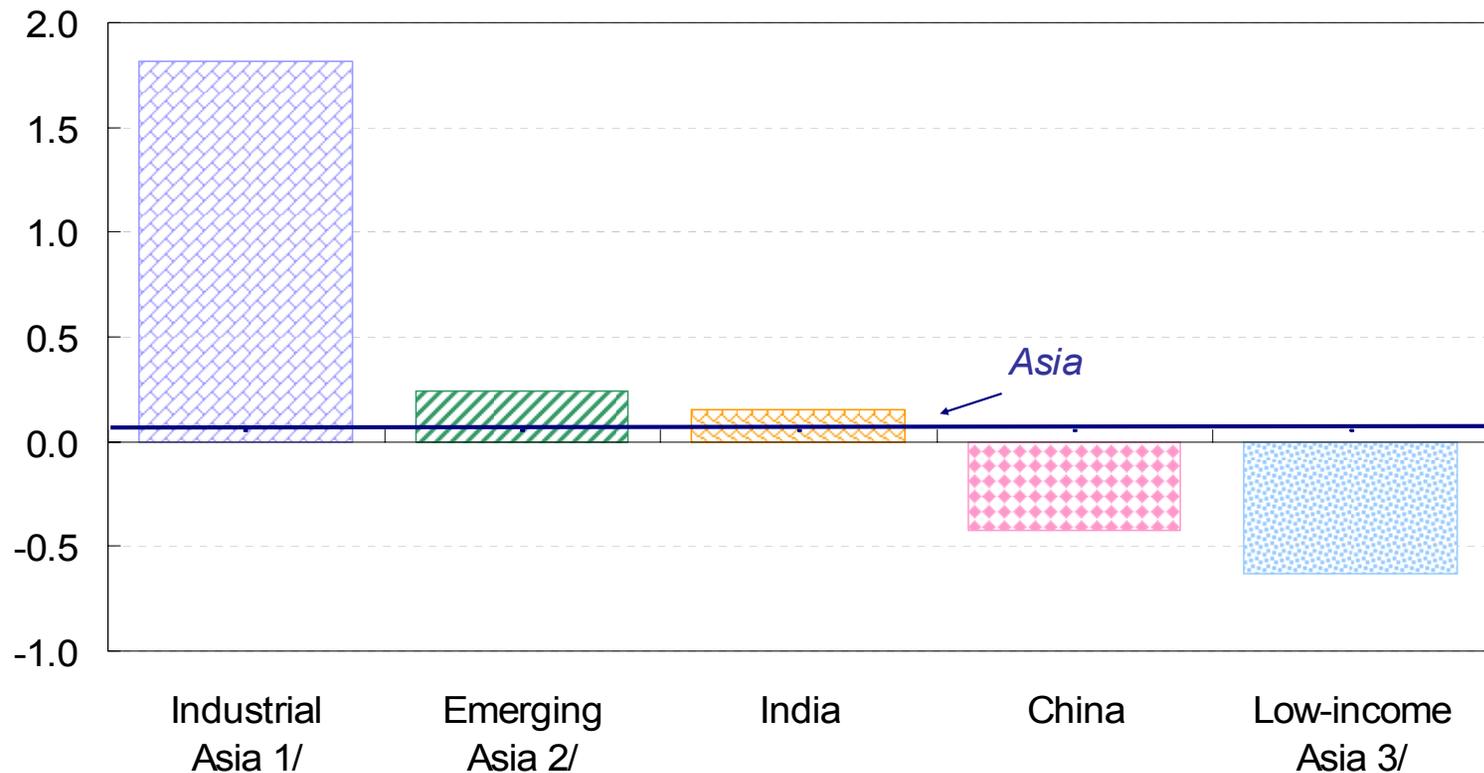

Marginal Effects on Growth

Low-income Asia	0.04
Emerging Asia	0.04
Emerging Asia, excluding India and China	0.04
Rest of developing countries	0.04

Rule of Law

Average of Rule of Law in 1970–2000

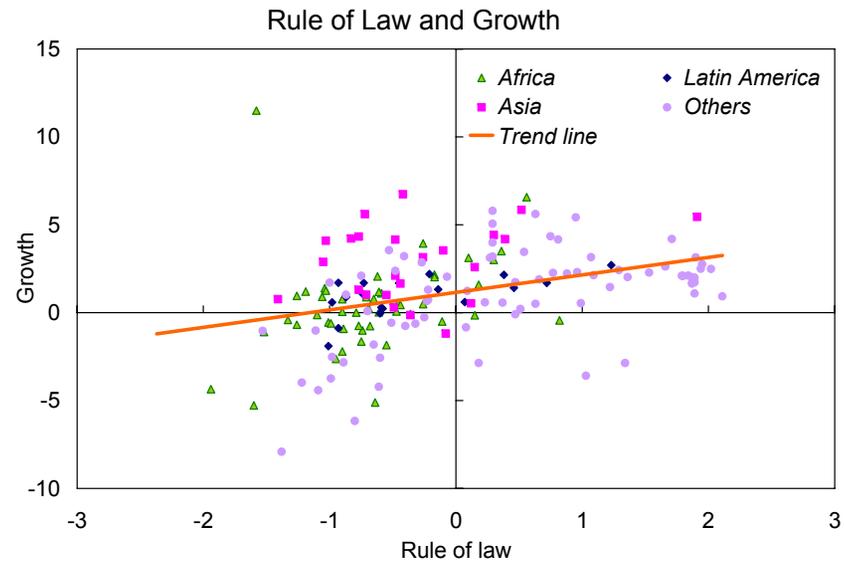

1/ Industrial Asia consists of Australia, Japan, and New Zealand.

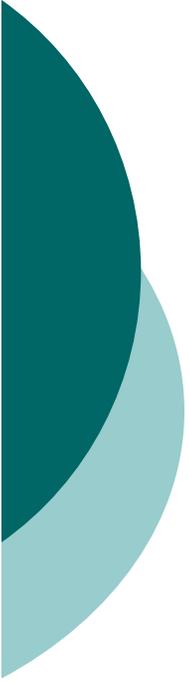

2/ Emerging Asia consists of Indonesia, Korea, Malaysia, Philippines, Singapore, and Thailand.

3/ Low Income Asia consists of Bangladesh, Bhutan, Cambodia, Lao PDR, Mongolia, Myanmar, Nepal, Sri Lanka, and Vietnam.

Marginal Effects on Growth

Low-income Asia	2.60
Emerging Asia	2.60
Emerging Asia, excluding India and China	2.66
Rest of developing countries	2.60

Main Findings from Comparative Analysis

- The effect of investment on growth in emerging Asia is around three times bigger than the effect in low-income Asia pointing to differences in MPK.
- Government consumption/GDP is higher in low-income Asia than in emerging Asia.
- Emerging Asia is more open to trade than low-income Asia by a margin of over 30 percentage points of GDP.
- Enrolment in primary schooling is similar between both groups and is not the main driver of difference in growth performance.
- The difference in the index for rule of law between emerging and low-income Asia is high and its marginal effect on growth strong.

III. Policy Recommendations

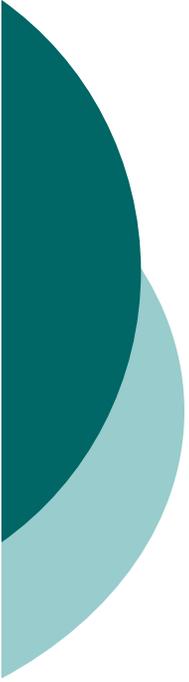

- Raise the marginal productivity of capital by:
 1. improving the business climate
 2. deepening the financial sector
 3. investing in human capital through training and education
 4. removing barriers to the free flow of technology
- Remove barriers to trade
- Improve the judicial system
