# World Economic and Financial Surveys

This series (ISSN 0258-7440) contains biannual, annual, and periodic studies covering monetary and financial issues of importance to the global economy. The core elements of the series are the *World Economic Outlook* report, usually published in May and October, and the quarterly *Global Financial Stability Report*. Other studies assess international trade policy, private market and official financing for developing countries, exchange and payments systems, export credit policies, and issues discussed in the *World Economic Outlook*. Please consult the *IMF Publications Catalog* for a complete listing of currently available World Economic and Financial Surveys.

## World Economic Outlook: A Survey by the Staff of the International Monetary Fund

The *World Economic Outlook*, published twice a year in English, French, Spanish, and Arabic, presents IMF staff economists' analyses of global economic developments during the near and medium term. Chapters give an overview of the world economy; consider issues affecting industrial countries, developing countries, and economies in transition to the market; and address topics of pressing current interest.

## Global Financial Stability Report: Market Developments and Issues

The *Global Financial Stability Report*, published four times a year, examines trends and issues that influence world financial markets. It replaces two IMF publications—the annual *International Capital Markets* report and the electronic quarterly *Emerging Market Financing* report. The report is designed to deepen understanding of international capital flows and explores developments that could pose a risk to international financial market stability.
