World Economic and Financial Surveys

This series (ISSN 0258-7440) contains biannual, annual, and periodic studies covering monetary and financial issues of importance to the global economy. The core elements of the series are the *World Economic Outlook* report, usually published in April and September, and the semiannual *Global Financial Stability Report*. Other studies assess international trade policy, private market and official financing for developing countries, exchange and payments systems, export credit policies, and issues discussed in the *World Economic Outlook*. Please consult the IMF *Publications Catalog* for a complete listing of currently available World Economic and Financial Surveys.

World Economic Outlook: A Survey by the Staff of the International Monetary Fund

The *World Economic Outlook*, published twice a year in English, French, Spanish, and Arabic, presents IMF staff economists' analyses of global economic developments during the near and medium term. Chapters give an overview of the world economy; consider issues affecting industrial countries, developing countries, and economies in transition to the market; and address topics of pressing current interest.

Global Financial Stability Report: Market Developments and Issues

The *Global Financial Stability Report*, published twice a year, examines trends and issues that influence world financial markets. It replaces two IMF publications—the annual *International Capital Markets* report and the electronic quarterly *Emerging Market Financing* report. The report is designed to deepen understanding of international capital flows and explores developments that could pose a risk to international financial market stability.

Emerging Local Securities and Derivatives Markets

by Donald Mathieson, Jorge E. Roldos, Ramana Ramaswamy, and Anna Ilyna

The volatility of capital flows since the mid-1990s has sparked an interest in the development of local securities and derivatives markets. This report examines the growth of these markets in emerging market countries and the key policy issues that have arisen as a result.
